

Contents

1	Introduction	1
1.1	The four problems $\mathbf{P}, \mathbf{P}_d, \mathbf{I}, \mathbf{I}_d$	2
1.2	Summary of content	4
Part I Linear Integration and Linear Programming		
2	The linear integration problem \mathbf{I}	9
2.1	Introduction	9
2.2	Primal methods	12
2.3	A dual approach	16
2.4	A residue algorithm for problem \mathbf{I}^*	20
2.5	Notes	31
3	Comparing the continuous problems \mathbf{P} and \mathbf{I}	33
3.1	Introduction	33
3.2	Comparing $\mathbf{P}, \mathbf{P}^*, \mathbf{I}$ and \mathbf{I}^*	35
3.3	Notes	39
Part II Linear Counting and Integer Programming		
4	The linear counting problem \mathbf{I}_d	43
4.1	Introduction	43
4.2	A primal approach: Barvinok's counting algorithm	45
4.3	A dual approach	47
4.4	Inversion of the \mathbb{Z} -transform by residues	51
4.5	An algebraic method	55
4.6	A simple explicit formula	70
4.7	Notes	74
5	Relating the discrete problems \mathbf{P}_d and \mathbf{I}_d with \mathbf{P}	75
5.1	Introduction	75
5.2	Comparing the dual problems \mathbf{I}^* and \mathbf{I}_d^*	76

5.3	A dual comparison of \mathbf{P} and \mathbf{P}_d	77
5.4	Proofs	82
5.5	Notes	85

Part III Duality

6	Duality and Gomory relaxations	89
6.1	Introduction	89
6.2	Gomory relaxations	90
6.3	Brion and Vergne's formula and Gomory relaxations	93
6.4	The knapsack problem	101
6.5	A dual of \mathbf{P}_d	104
6.6	Proofs	106
6.7	Notes	114
7	Barvinok's counting algorithm and Gomory relaxations	117
7.1	Introduction	117
7.2	Solving \mathbf{P}_d via Barvinok's counting algorithm	118
7.3	The link with Gomory relaxations	122
7.4	Notes	123
8	A discrete Farkas lemma	125
8.1	Introduction	125
8.2	A discrete Farkas lemma	127
8.3	A discrete theorem of the alternative	136
8.4	The knapsack equation	139
8.5	Notes	140
9	The integer hull of a convex rational polytope	141
9.1	Introduction	141
9.2	The Integer Hull	142
9.3	Notes	149
10	Duality and superadditive functions	151
10.1	Introduction	151
10.2	Preliminaries	153
10.3	Duality and superadditivity	155
10.4	Notes	160
A	Legendre-Fenchel, Laplace, Cramer and \mathbb{Z} transforms	161
A.1	The Legendre-Fenchel transform	162
A.2	Laplace transform	163
A.3	The \mathbb{Z} -transform	168
A.4	Notes	170
	References	171
